## EDUCATION

---

**Bachelor of Arts in Computer Science**, *Columbia University*

2023-Present

- 3.88/4.00 Cumulative GPA
- Dean's List 2023-2025

## RELEVANT COURSEWORK

---

- Data Structures in Java
- Fundamentals of Computer Systems
  - Intro to processor design and assembly languages
- Advanced Systems Programming
  - C and Unix fundamentals, networking basics, implementing Unix libraries and tools
- Databases
  - Create database in PSQL and query it in SQL
- Computer Graphics
  - Implementing raytracer and rasterizer, meshes, and skeleton kinematics in a virtual 3d space
- C++ Deep Dive for C Programmers
  - Building C++ from C, implementing C++ containers and template meta programming

## WORK EXPERIENCE

---

**Research Project Lead**, *Columbia University Geometry Lab*

Fall 2025-Present

- Leading project to visualize rock climbing walls in virtual reality with ML generated climbing paths
- Wrote program to sample point clouds from randomly generated seed-based rock climbing walls
- Training ML model to recognize specific holds on a novel rock climbing wall

**Cyber Intern**, *Protek IT Solutions*

Summer 2025

- Explored Google SecOps test environment, evaluated SIEM and SOAR environments for analyst use
- Created use cases and playbooks in SecOps test environment
- Compiled and delivered findings to team, presentation later adapted for client use

**Lead Programmer, Artist, and Cowriter**, *Personal Project*

2024-Present

- Programmed visual novel in Python using game engine RenPy.
- Drew over 100 character models and background frames, and wrote 40 pages of dialogue

**Peer Tutor**, *Berrick Center for Student Advising*

2024-Present

- Spend 7 hours weekly preparing lesson plans and communicating with students

**Research Assistant**, *INOVA Heart and Vascular Institute*

Summer 2021, Summer 2022

- Retrieved daily COVID-19 ECMO patient information from 80 patients in INOVA Electronic Health, assisted in development of a program to automate data transfer

## SKILLS

---

**Technical:** Java, Python, C, C++, Git, LaTeX, object oriented programming, basic art skills, basic blender

**Languages:** Intermediate Spanish, basic Korean
